WORK EXPERIENCE

Smart Call Solutions (Pvt) Ltd – Rawalpindi, Pakistan

Senior Software Developer

[31/05/2026 – Current]

- Lead a cross-functional team of 5 developers, 2 designers and 2 SEO specialists: sprint planning, task allocation and QA.
- Supervise Flutter, React, Node.js and Express.js development across concurrent client projects (Zentera Tech, United Taxis, Ashford Taxis, Smart Call Solutions, TeleSolutions Call Central).
- Conduct technical interviews and mentor junior developers through code reviews to keep the team on clean MVVM, MVC and Clean architecture standards.
- Act as the client main technical contact: gather requirements, report progress, write technical specifications.

Web programmer

[01/09/2025 – 31/05/2026]

- Built front-end and back-end features for enterprise client applications with the MERN stack (LeatherHood Ecommerce, Ashford Premier Taxi).
- Delivered a custom WordPress plugin that automates attendance, salary and employee management, replacing a manual process.

CareCloud – Rawalpindi, Pakistan

IT Intern - Flutter Developer

[01/05/2025 – 30/06/2025]

- Built Flutter apps for a mobile health platform using MVVM and Provider, with secure patient data handling.
- Built school management features (attendance tracking, grade reporting) with Hive local storage

Technofies – Islamabad, Pakistan

IT Instructor – Microsoft Azure & AI

[01/02/2024 – 28/02/2025]

- Taught programming and Azure to student cohorts through project-based learning, and designed and maintained the course content.

Stella Technology – Islamabad, Pakistan

Summer Intern - Mobile Developer

[10/07/2023 – 31/08/2023]

- Developed native Android apps in Kotlin, integrating third-party APIs and following Material Design guidelines; used GitHub for version control.

EDUCATION AND TRAINING

Bachelor of Science in Computer Science

Air University [2021 – 2025]

City: Islamabad | **Country:** Pakistan | **Website:** https://www.au.edu.pk/ | **Final grade:** CPGA: 3.18/4.00

- Final year project: AIRWay, a real-time indoor AR navigation app for Centaurus Mall, with a web companion for route and store management (Flutter, Dart, AR, Firebase, Google Maps API). Supervisor: Ms. Warda Aslam
- Relevant coursework: Data Structures, Algorithms, Database Systems, Mobile App Development, Web Technologies, Software Engineering
- Language of instruction: English

A Levels

Westminster International School [2019 – 2021]

City: Rawalpindi | **Country:** Pakistan

O Levels

Beaconhouse Educational Complex [2017 – 2019]

City: Islamabad | **Country:** Pakistan

PROJECTS

Health Drift – ML-Based Symptom Prediction and Data Drift Monitoring Technologies: Python, Scikit-learn, Pandas, FastAPI, Evidently AI, Joblib, GitHub Actions, Render**Description:** Developed a machine learning application using a Random Forest classifier to predict disease categories from structured symptom data. Built a FastAPI service for model inference and integrated Evidently AI to monitor data drift and generate reports. Configured a scheduled GitHub Actions workflow for model training and drift monitoring and deployed the API on Render. This project explores machine learning deployment and monitoring.Write here the description...

Link: https://github.com/mahrukh-dev/health-drift-project

AIRWay - Augmented Reality Indoor Navigation System Technologies: Flutter, Dart, Augmented Reality (AR)**Description:** Developed a final-year project focused on indoor navigation within Centaurus Mall, Islamabad. The application aims to help users navigate indoor spaces using an augmented-reality-based approach. The project explores mobile application development and navigation in complex indoor environments.

Hand Gesture Controlled Car Game Technologies: Python, OpenCV, MediaPipe, Pygame, NumPy**Description:** Developed an interactive car game controlled through hand gestures captured by a webcam. Used computer vision and hand-tracking techniques to detect hand movements and translate them into game controls. Integrated gesture recognition with the game interface to create a touch-free interaction experience.

VOLUNTEERING

Air University Computing & Innovation Society (AUCIS) Vice President, 2025 Lead of Women in Computing, 2023 – 2024.Led a 100-member team that organised events and coding competitions (Code Royale, Code Champs) with 200+ attendees.

• **Robotics & Automation Society (RAAS) — Executive Secretary, 2025** Lead of the Software Team, 2023 – 2024.Directed a software team building automation solutions for robotics projects and helped run events of up to 400 attendees.

• **GDGoC Air University — Lead of Women in Tech, 2024** Organised Code Air Extended, with 300+ female attendees.

SKILLS

Programming

Dart / Kotlin / JavaScript / Java (computer programming) / Python (computer programming) / SQL / CSS & HTML

Mobile Development

Flutter / Native Android Development (Kotlin, Java) / React Native / State Management / Riverpod / GetX / Provider / Bloc

Web Development

React JS / Next JS / Node JS / Express JS / Tailwind CSS / Restful APIs

Database and Cloud

MongoDB / PostgreSQL / AWS S3 / Firebase: Firestore, FirebaseAuth, Firestorage, RealTime database / Supabase / Azure / MSSQL, MySQL, SQLite

Architechture and Practice

Architectural patterns(mvp, mvc, mvvm) / Clean Code, Clean Architecture, SOLID / Github / Version Control (Git) / JIRA / Agile project management / Scrum Meetings and Communication / Code Review / CI/CD

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s): English
